Abstract (en)
[origin: WO2004045969A1] The container comprises a body, which has a conical round shape, a bottom and an encircling sidewall, is mirror-symmetrical with regard to a longitudinal central plane and to a transversal central plane by opposing apexes, and enlarges toward an upper opening. The sidewall follows three arcs and, to be precise, an arc at the apexes and an arc, which is located therebetween and which merges into the arcs at the apexes both continuously and with the same slope (smoothly).
