Abstract (en)  
[origin: WO2004046973A2] The invention relates to a system and a method for the graphical recording of system requirements and specifications in electronically readable form. Elements of a plant are graphically represented by selectable components (21). The components (21) are graphically rendered in a relationship (23) to each other and a control-relevant circuitry (24) automatically specified based on the established relationship (23) and prepared in electronic form.
