Abstract (en)

[origin: CA2504645A1] The invention relates to a warehouse (1) for providing transfer cars (6) which are guided in at least one guiding rail (2) in a successively arranged manner. The inventive warehouse comprises at least one unlockable transit barrier (3) for retaining or releasing the transfer cars (6), and a money cashing device (5) which is used to trigger the transfer cars (6) and is electrically connected to the at least one transit barrier (3). The invention is characterised in that the at least one transit barrier (3) is either exclusively carried by the at least one guiding rail (2) or is at least partially supported on the floor.
