Abstract (en)

[origin: EP1563915A1] The gutter has a wing (12) with one end (14) in contact with a door and another end (16) directed towards a non-aesthetic zone such as ground, to deviate leakage of a dip in which the door is immersed. The wing (12) is connected to the door using another wing (18) that is fixed to the door using a clip (20) in an opening of the door. The gutter is held on the door by magnetism of the wing (18). An independent claim is also included for a method of treating a surface of a door of a vehicle.
