Abstract (en)
[origin: EP1564336A1] Thermally insulating construction element (1) comprises an insulating body (2) containing reinforcing elements (5, 8). Bearings (6) embedded in the insulating body to absorb compressive and shearing forces are made of a hardenable material that is suitable for casting and injecting and consists of a plastic or mineral base material. Preferred Features: The bearing consists of a sleeve body made of plastic or stainless steel and a filling.
