Abstract (en)
    [origin: EP1564775A2] When fitted, a top (71) and bottom (61) first end protrude from a plastic base part (21) so that contact surfaces run vertical to the lengthwise stretch of a headlamp. Electrical connections each have a right (72) and left (62) second end to connect to a current supply wire. During each electrical connection, the first and second ends each interconnect via center sections. An independent claim is also included for a headlamp with a base.
