Abstract (en)
[origin: FR2847453A1] The instrument, especially a file (3) or cutting block designed for one-time use, has at least one part made from a plastic material that is slightly harder than bone tissue, e.g. by 5 - 30 per cent, with an insert (4) of a harder material, especially of metal, embedded in the plastic. The plastic breaks down at a temperature of 50 - 200 deg C, preferably between 70 and 150 deg C, and especially at 137 deg C. The instrument can also include a section having a shape memory effect
