Abstract (en)

[origin: FR2845357A1] Fixing element for fastening dispenser to neck of container with inner surface and upper rim surface, comprises receiving section for dispenser and fixing zone coated with layer of adhesive that makes contact with rim surface. The fixing zone is on underside of annular flange between inner sleeve that seals against inner surface of neck and outer skirt that fits over its outer wall. A fixing element for fastening a dispenser (2) to the neck (3) of a container with an inner surface (31) and an upper rim surface (32), comprises a receiving section (10) for the dispenser and a fixing zone (14) coated with a layer of adhesive (15) that makes contact with the rim surface. The fixing zone is on the underside of an annular flange (13) between an inner sleeve (19) that seals against the inner surface of the neck and an outer skirt (17) that fits over its outer wall (33).
