Abstract (en)
[origin: WO2004043823A1] A monitored dosage apparatus (10) includes a base member (12) having a plastics sheet with a plurality of formations therein, the formations providing open-topped receptacles (16) for receiving medication. The apparatus (10) also includes a lid member (14) having a plastics sheet for sealing to the base member (12) to close and seal the receptacles (16), the seal being formed by an adhesive. The apparatus (10) also has means (24, 26) for selectively opening individual sealed receptacles to release the medication contained therein.
