Abstract (en)

[origin: FR2847279A1] The device has an electronic board (37) to manage control of an actuator (3) of a terminal (2). A battery (38) feeds electricity to the actuator and photovoltaic cells charge the battery. The cells are protected by a transparent wall constituting a face or a part of a face of a technical chamber. A receiver (39) obtains information of a transmitter to inform the board and permit withdrawal of the terminal.
