Abstract (en)
A screen (30) including a panel (32), a first member (70) connected to the panel and extending along an edge thereof; a second member (72) extending generally parallel to the first member (70) and adapted to be secured to a supporting surface, and a fastening mechanism connecting the first member (70) to the second member (72); characterised in that the fastening mechanism comprises a screw-threaded fastening element (78) having respective parts which co-operate with formations (80; 88,89) connected to the first member (70) and second member (72) to connect them to one another, and rotation of the fastening element (78) effects adjustment of the inclination of the members (70,72) relative to one another.
