Abstract (en)

[origin: EP1566338A1] The bottle unit has a first bottle (1) and a second bottle (2). The first bottle has an outlet aperture (3) at the top, with a cap (4). The first bottle also has a lower filling aperture (7) with a closing element (8). The second bottle has an upper connecting aperture (10) with a cap. The two drink components can be mixed via the connection between the connecting aperture of the second bottle and the filling aperture of the first bottle.
