Abstract (en)
A carton comprising a rectangular tubular body and an end closure structure closing one or each of the opposite ends of the tubular body, the end closure structure includes a pair of overlapping, mutually glued major panels hingedly connected to first opposed walls of the tubular body respectively and a minor flap hingedly connected to at least one of second opposed walls of the tubular body and lying between the major flaps, and the minor flap has a cut-away portion to increase the area of one of the major flaps directly glued to the other. <IMAGE>
