Abstract (en)  
[origin: EP1566505A1] Safety device for a motor vehicle comprises at least one control device for a door-unlocking system via which the vehicle doors are automatically unlocked when required. The control device is designed so that when a safety limit is exceeded or in the event of a known danger situation the doors are unlocked separately without necessary actuation of another active or passive safety system. An independent claim is also included for a motor vehicle comprising the above safety device.
