Abstract (en)
[origin: WO2004037051A1] The structure (40) is particularly useful for mobile businesses and comprises a central frame (41-110-121) including pairs of height-adjustable wheels (44, 45, 46). Horizontal frameworks (58, 59-103, 104-111-123) and vertical frameworks (70, 71-100, 101-112-128) are hinged to said central frame (41-110-121) in such a way as to translate between a folded resting position and an opened operative position. The central frame (41-110-121) delimites, together with said horizontal (58, 59-103, 104-111-123) and vertical frameworks (70, 71-100, 101-112-128) in their folded resting positions, a compact box-shaped structure which is suited to house all the means needed to assemble a display stand or a craft working bench or an advertising stand for tasting foods and beverages and which is slidably movable on said pairs of wheels (44, 45 e 46) between the vehicle (140) and the site where the display stand or the workbench is to be assembled and used.
