Abstract (en)
[origin: WO2004048045A1] The invention relates to an electric hand-held machine tool, especially an angle screwdriver, which comprises a machine housing (10), an adjustable angle working head (12) mounted on the working end of the machine housing (10) and a drive shaft (18), off-set vis-à-vis the housing axis (101) for driving a tool, and a lighting device (22) disposed on the machine housing (10) for illuminating the work point of the tool. In order to optimally illuminate the working point in any working positions of the adjustable angle working head (12), the lighting device on the working end of the machine housing (12) is disposed on the same and is adapted to be rotated about the housing axis (101) of the machine housing (10).
