Abstract (en)
[origin: WO2004048097A1] The invention relates to an ink reservoir doctor blade (1) which comprises the following features: two doctor blades (2) that can be pitched against a roller (6) in a roof-like manner, two of said doctor blades (2) being fixable by means of a clamping sheet (3) to the doctor blade reservoir body (5), the clamping sheet (3) being functionally linked with fastening means (4) that are elongated in the axial direction (z) of the roller (6), said fastening means being disposed substantially parallel to the clamping sheet (3), and making available the force required for fixating the at least one doctor blade (2). The invention is characterized in that the resultant of the force made available by the fastening means (4) points in direction of the doctor blade reservoir body (5).
