Abstract (en)

[origin: WO2004050999A1] The invention relates to a device for modifying the layout of a vehicle racetrack in a wide section (11) of the track. Said device comprises an arrangement (18) consisting of individual elements (19) for defining the edge of the track, located in the region of the track section (11) to be modified. Said elements can be displaced, either individually or in groups, from an initial configuration of the section of track (11) into a new configuration for reshaping a bend in the racetrack and/or the division of the racetrack.
