Abstract (en)

[origin: WO2004051026A1] The flashing device (101) has a sealing member (120) for sealing between the flashing parts (102, 103) and a side cladding device to provide a transition between a roof penetrating structure and a surrounding roofing. The sealing member (120) has a sealing portion (121) and an engagement portion (122) connected with the sealing portion and with one of the flashing parts. The relative position between the flashing parts is adjustable.
