Abstract (en)

[origin: DE10052750A1] The support device comprises sliding cylindrical bodies (4) over which the loops (2) are hung. The cylindrical bodies can be sleeves (4) with end radial projections formed as ring collars and the width of the loop corresponds to the distance between the two radial projections. The sleeve fits with radial play on the curtain rod.

[origin: DE10052750A1] The support device comprises sliding cylindrical bodies (4) over which the loops (2) are hung. The cylindrical bodies can be sleeves (4) with end radial projections formed as ring collars and the width of the loop corresponds to the distance between the two radial projections. The sleeve fits with radial play on the curtain rod. -
