Abstract (en)

[origin: EP1568840A1] The door has a framework (2) fixable at a building side, a door blade (4) and an upper slide rail (3). An upper cross beam (7) of the framework forms a part of the slide rail and is extended to completely form the slide rail over the framework. The upper cross beam is interconnected with an extension profile (7a) through a locating pin. A distance of a roller to the door blade is adjustable.
