Abstract (en)

[origin: EP1569189A2] The device has a label (5) in rigid or semi-rigid material and having a front side forming a data medium and including identification zones related to a code for recognizing wine contents in a bottle (3). The label has a rear side on which a resilient material part (9) is applied. The part is covered with an adhesive on a side opposite to the label, for sticking the label in an annular edge (4) of a bottle's bottom (2).
