Abstract (en)  
[origin: EP1569257A1] The sensor has two expansion units, where one unit is connected to a housing (10) of a switch. The other unit with different thermal expansion coefficient is connected to the former unit in free end of the later unit. A spring acts on the latter unit in an axial direction, where the latter unit acts upon a contact spring from one side. The spring acts upon the contact spring from another side through a support.
