Abstract (en)
[origin: WO2004043180A1] A cooling system for garments (1), cooling by expansion of gas into the atmosphere, comprising a reservoir (4) arranged for storing a compressed gas, a covering (10) arranged for containing said compressed gas and connection means (18) arranged to allow a flow of gas from said reservoir (4) to said covering (10). Said covering (10) further comprises expulsion means (16) for expelling the gas from the covering (10), said expulsion means (16) comprising at least one portion (34) permeable to the compressed gas, arranged to allow a gradual flow of gas to wards the outside of the covering (10) to be discharged into the atmosphere.
