Abstract (en)
[origin: WO2004054659A2] The invention relates to a sporting piece of apparatus comprising a handle for holding and controlling said apparatus, and a traction mechanism which is actively connected to the handle and exerts a tractive force on the handle and an object coupled thereto in an active state. The handle is provided with a safety mechanism which deactivates the traction mechanism once a threshold value of the tractive force is reached.
