Abstract (en)
[origin: WO2004052550A1] A shower head with a housing and a jet outlet surface can be achieved with an example embodiment of the invention. An adjuster device is provided on one side, for adjusting the supply of water to individual or all regions, into which the jet outlet surface is divided. The above can be a central small region and the region surrounding the above. Furthermore, an air supply device is provided for aerating the water jets. The air supply device is simultaneously operated with the switching between the regions.
