Abstract (en)
[origin: WO2004054335A1] The invention relates to a circuit board for a radio module, comprising a connector on the circuit board with contact points for an optional connection of a plug, selected from a number with various contact point arrangements, of a given plug type, whereby, according to the selection of the plug from the number of plugs with different contact point arrangements, a plug specific selection of the contact points on the circuit board connector can be made.
