Abstract (en)
Protective strip (1) to cover and protect floors, walls and other surfaces (6) while painting, bricklaying or other work in general is being carried out, which is mainly characterised in that it is made up of a protective element (2), preferably a wide strip of paper, and, on its side edges (12), the necessary fixing elements (3), preferably masking tape or painter's tape. The strip (1) is presented in rolls (10) with the particularity that the masking or painter's tape itself (3) provides the means of adhesion to the surface to be protected (6) while at the same time it provides the means of nonadherence of the protective strip (1) with regard to itself when the product is rolled up. To achieve this, the protective element (2) is provided with some gaps (9).
