Abstract (en)

The filling element (1) is designed for contactless filling whereby the bottle (2) is set with its mouth (2.1) spaced from the filling element underneath the delivery opening (8). A probe (17) which determines the filling level is movable through a probe adjusting member (23) between a starting position where the probe is outside the bottle, and a measuring position where the probe extends through the bottle opening into the bottle. Independent claim describes filling machine with filling elements provided on a rotor. An actuating element (13,14) for the liquid valve (9) can be a pneumatic cylinder.

Abstract (de)

Bei einem Füllelement (1) zum berührungslosen Füllen von Behältern (2) mit einem flüssigen Füllgut ist eine die Füllhöhe bestimmende Sonde (17) durch ein Sondenstellglied (23) zwischen einer Ausgangsposition, in der sich die Sonde außerhalb des Behälters befindet, und einer Messposition bewegbar ist, in der die Sonde durch die Behälteröffnung in den Behälter hineinreicht.
