Abstract (en)

[origin: EP1571398A2] The burner system of a cooking installation comprises units supplying fuel and combustion air and removing exhaust gases or steam, with some or all such units provided at least within certain sections with perforation openings such as, for example, perforation openings (12, 12', 14, 14') in a supply pipe (2). An independent claim is also included for a cooking installation with the proposed burner system.
