Abstract (en)  
A gaming machine includes a medal insertion slot 22 having an opening 101 for a player to insert a medal so that the player inserts a medal through the opening 101 for playing a game. The medal insertion slot 22 includes: a medal guide projection 102 projecting in the forward direction of the gaming machine for guiding a medal to the opening 101; and a medal guide projection 102 being made asymmetrical. Accordingly, when the player inserts medals into the medal insertion slot, failure of inserting medal as the thumb or the forefinger of the player or the medal, etc., hits with the projection part can be lessened and the player can easily insert medals into the medal insertion slot. <IMAGE>
