Abstract (en)  
The gaming machine in accordance with the present invention comprises first and second display means for displaying an image; display control means for controlling the display of the first and second display means; and touch input means for inputting input information corresponding to a touch position of a finger. In this gaming machine, after the game shifts from a base game to a bonus game, a gaming image including a help operation key image for displaying a gaming explanation image concerning a gaming content in the bonus game is displayed by the first display means, and the gaming explanation image is displayed by the second display means when the input information corresponding to the help operation key image is fed from the touch input means. <IMAGE>
