Abstract (en)
[origin: EP1571735A2] Electronic component, especially for telecommunications and/or data transfer systems, comprises a primary installation board (1) which is rigid, and secondary installation board (2) which is a conducting board and flexible. The secondary board has a primary end (3) which is fixed to the primary board. The secondary end (4) is attached to the primary installation board. A parallel conductor section (5) connects the two end sections.
