Abstract (en)

[origin: FR2847495A1] The method of making a mounting bracket for an upright involves stamping a blank out of steel sheet to define a rectangular central part (11) and two side plates each including a wing (12,13) bordered laterally by a flange (16,17) with a slot (16A,17A). Each flange has a tongue (22,23) to fit onto a rectangular opening (24,25) in the other wing. The blank is folded to form the bracket. Claims include a bracket made by the method.
