Abstract (en)
[origin: WO2004056520A1] The invention relates to a deep hole drill consisting of three sections, a drill head (1), a shank (2) and a clamping element (3). The drill head (1) and the shank (2) are provided with at least one preferably straight-grooved machined groove (5). In order to be able to carry out drilling in a more economic manner with improved feed values, the shank (2) is made of a hard metal. The drill head (1) can be made of a hard metal which is different from the hard metal of the shank (2).
