Abstract (en)
[origin: WO2004065123A1] The invention relates to a web-fed rotary press comprising at least one printing group in which at least one exchangeable, inkable plate cylinder (1) and at least one exchangeable rubber blanket cylinder (2) are arranged respectively in movable bearings and fixed bearings in such a way that they can be removed from the movable bearings. The plate cylinder consists of a drivable core (3) and an exchangeable sleeve (6) which is placed over the core, and the rubber blanket cylinder (2) consists of a synchronously drivable core (3) and an exchangeable sleeve (27) which is placed over the associated core. At least one of the cylinder sleeves (6, 27) is connected to the cylinder core (3) thereof in a positively locking manner.
