Abstract (en)
[origin: WO2004054808A1] The invention relates to a printing blanket assembly for a blanket cylinder of a rotary printing press. The printing blanket assembly comprises a dimensionally stable support plate and a printing blanket fastened to the outside of the support plate. The forward end and/or the trailing end of the support plate is fastened to the blanket cylinder with a folded, printing-blanket free limb and between the beveled edge and the inside of the printing blanket a filler mass is arranged.
