Abstract (en)

[origin: EP1435329A1] The invention relates to a container (1.1 - 1.5) and a packaging, for example packaging for remedies, comprising a plurality of such containers. Containers and packaging of the type according to the invention are used, for example, in clinical trials of drugs or remedies. According to the invention, it is intended to provide the container or containers with a covering (8) which is arranged on the outside of the container wall and either changes the appearance of the container wall or makes the pharmaceutical formulation (7.1 - 7.5) appear opaque through any transparent container wall, so that the appearance of the container wall and/or of the pharmaceutical formulation, for example whether it is a coloured, liquid, pulverulent, lyophilized or granular formulation, is visually undetectable for a user. <IMAGE>
