Abstract (en)

It comprises a housing (1) with an opening at one of its sides, guide means (3) for linearly guiding the movements of a flat screen (4) in relation to said housing (1) and through said opening, and activating means (5) for activating said movements in a direction inwards the housing (1), as far as a safe storage position, and in a direction outwards the housing (1), as far as a working position. Furthermore it comprises connecting means for connecting, in a moving way, the housing (1) to a support (6) in order to vary the flat screen (4) inclination in relation to said support (6) for adapting a viewing angle in said working position. <IMAGE>
