Abstract (en)
[origin: EP1574443A1] A storage box includes an upper box body (10) and a lower box body (20) defining a respective top open chamber (12,22) and hinged together in such a manner that the upper box body can be turned horizontally relative to the lower box body between a received position where the upper box body and the lower box body are vertically arranged in a stack, and an extended position where the upper box body and the lower box body are set in an offset relationship and the upper box body defines with the lower box body a bottom open chamber (14) below the top open chamber of the upper box body for storage items. <IMAGE>
