Abstract (en)
[origin: EP1574633A2] The prefabricated wall module for the erection of dividing walls has several conduit channels (1) located between the main surfaces of the module and running in the same direction parallel to them, and are designed to accommodate pipes, cables and suchlike. The conduit channels are installed close to each other in such a way that with the introducing of a conduit channel-like opening at any point of the main surface at least one of the conduit channels is accessible.
