Abstract (en)

[origin: EP1574639A1] Described is a cremone handle for outward opening window units comprising a fixed frame (1) and a mobile sash (2) connected to the fixed frame (1); the lower horizontal member (5) of the sash (2) being fitted with a handle unit (8) for opening and closing the sash (2); the handle unit (8) comprising: a handle body (9) which can be attached to the lower horizontal member (5) of the sash (2); a movement grip (10) projecting from one side of the handle body (9) and able to rotate about an axis of movement (Z); control parts (11), projecting from the opposite side of the handle body (9) and able to connect to movement devices (12) for forming the sash (2) closing and opening configurations; the handle unit (8) also comprises an angled connecting element (13), inserted between the handle body (9) and the grip (10), and which can be connected on one side to the control parts (11), through the handle body (9), and on the other side has means (14) for a removable connection to the grip (10), applicable reversibly, that is to say, on the right or on the left of the handle body (9), to the connecting element (13) and able to rotate with said element (13) about the axis of movement (Z).
