Abstract (en)

[origin: WO2004019724A3] The invention concerns a method for hair decoration which consists in applying on the hair one or several ribbons comprising a support in the form of a thin plastic film with its surface coated with a decorative element in the form of a deposition of material having a colour different from that of the hair, said decorative element being itself coated with an adhesive layer capable of being activated by a suitable means. The heating clip (1) seizes a hair lock (3) and a ribbon (2) and, under the effect of the pressure and the duration of the application, transfers onto the hair the decoration provided on the ribbon. Further, an additional form of execution is represented wherein the user uses a marking set comprising a hair clip (5) with a device for fixing the ribbon (2), the heating clip (1) and the ribbon itself.
