Abstract (en)
[origin: WO2004054614A1] The invention relates to polynucleotides coding for the PPVO viral genome, to fragments of the polynucleotides coding for the PPVO genome and to polynucleotides coding for individual open reading frames (ORFs) of the PPVO viral genome. The invention also relates to recombinant proteins expressed from the above mentioned polynucleotides and to fragments of said recombinant proteins, and to the use of said recombinant proteins or fragments for the preparation of pharmaceutical compositions.
