Abstract (en)  
[origin: FR2846907A1] The process involves receiving printing order (4) containing information relating to a required color and the color of ink drops. The required color and the color of ink drops are matched with an equivalent color and drops to obtain an equivalent color in a pixel, where the equivalent color is satisfied a sensory response of the human eye. The equivalent color and drops are applied to a printer for the printing order. Independent claims are also included for the following: (a) an ink-jet color printer (b) a memory medium containing a software to control an ink jet color printer.
