Abstract (en)
[origin: WO2004039694A1] The invention concerns a fluid product dispenser characterized in that it comprises: a gas reservoir (12) defining an actuating wall (120) to cause the reservoir volume to vary thereby driving the gas out of said reservoir; at least one fluid product reservoir (13) defining an actuating wall (130) to cause the reservoir volume to vary thereby driving the fluid product out of the reservoir; at least an outlet (141) common to the gas reservoir (12) and to a fluid product reservoir (13); a gas supply conduit (15) connecting the gas reservoir (12) to the common outlet (141); and at least a fluid product supply channel (16) connecting the fluid product reservoir (13) to the common outlet (141).
