Abstract (en)
[origin: JP2004091419A] <P>PROBLEM TO BE SOLVED: To provide an effective makeup method based on a texture by synthetically arranging relations between makeup and the texture, which is not proposed conventionally; and to provide a texture map suitable for the use in the makeup method. <P>SOLUTION: Many texture words expressing the texture of the makeup are selected, and the selected many texture words are classified to two kinds according to the properties of materials. One property is positioned along the vertical axis and the other property is positioned along the horizontal axis to position the mutual position relation of a texture word by the vertical and horizontal axes to map the texture word. A texture image map is formed by overlapping an individual image on the texture word map, and the makeup of the texture is carried out based on the texture image map in the makeup method. <P>COPYRIGHT: (C)2004,JPO
