Abstract (en)

A method for the production of a pallet (10) having a high stability and resistance for bundles of tubes, in particular tubes (23, 33, 43) for industrial, electrical, electronic and electro-technical applications, comprising the following phases:preparing a series of tubes (23, 33, 43);packaging said tubes into bundles (22, 32, 42) with a polygonal section by means of a plastic film (14);neatly arranging the bundles of tubes so as to form stable bases, in order to create a package (15) of tube bundles (22, 32, 42) positioned on a series of supporting beams (16);preparing a series of simple beams (17) each above the package (15) in correspondence with each supporting beam (16);fastening the beams (16, 17) and package (15) with a metallic strap compressing them to form a pallet (10).
