Abstract (en)

[origin: EP1577257A2] The device has a hydraulic pump (5) coupled to an electric machine. The pump provides pressure medium being sucked from a tank for consumers. A lifting valve and a check valve (17) are disposed in a pressurizing or lifting conduit to a lifting cylinder. A lowering branch is connected between the lifting cylinder and the check valve. The lifting valve is disposed downstream from branching of a conduit.
