Abstract (en)

[origin: EP1577465A1] Lock element comprises a lock body (2), a locking element (4) that rotates relative to the lock body, and a cavity protruding into the lock body in which an actuating element (8, 8') coupled to the lock element and rotating relative to the lock body is removably fixed to a cylindrical fixing section (9). The fixing section is provided with a peripheral groove engaging with a catch element that is displaceably guided in the lock body radially to the axis of the fixing section and is loaded by a spring in the direction of the groove. Preferred Features: The lock body is a profiled cylinder.
